

Community Grants Program

2023-2024 Round 2 – Conservation Support

Successful Applications

Grant ID	Applicant / Organisation Name	Project Title and Description	Approval Amount
CS-242-008	Ms Lucy Blaber	<p><u>Keeping Wildlife in the Redlands</u></p> <p>This project will build on the applicant’s previous work as a Wildlife (Bird) carer over the last 2 years. Caring mostly for precocial chicks (ducklings, plovers, curlews), they have been gradually extending facilities so that more birds can be taken for a longer period of time. This project will allow birds to be kept outside in a safe and suitable environment. This means that when ready, birds can be transferred directly from indoor to outdoor facilities with minimal disruption. Current outdoor facilities are limited and lack some safety features (eg not fully snake or weather proof).</p>	\$1,232.74
